EDUCATION

Rajiv Gandhi Institute of Petroleum Technology

B.Tech. in Electronics Engineering(CGPA: 7.76 / 10)

Jais, Amethi

2022-27

Senior Secondary

RBSE Board (Percentage: 81%)

Academic Year

2022

Secondary

RBSE Board (Percentage: 78.33%)

Academic Year

2020

EXPERIENCE

Xilinx FPGA Project Series 15-Day Hands-on Project Series

Feb 2026–Mar2026

15-Day Hands-on Project Series

Linkedin

- Accomplished 15 FPGA projects using Vivado for RTL design, simulation, synthesis, and bitstream generation.
- Developed proficiency in Verilog/VHDL with functional simulation and timing analysis.

National Institute of Electronics and Information Technology (NIELIT)

June 2025–July 2025

VLSI Design Flow Intern (RTL to GDS-II)

Location

- Completed RTL to GDS-II flow for 32-bit RISC-V processor using open-source EDA tools (QFlow, Yosys, Graywolf, Qrouter, Magic, OpenSTA) in 180nm technology
- Performed synthesis, floorplanning, placement, routing, STA, and DRC/LVS verification with error-free layout.

DHOOT Transmission Pvt. Ltd.

June 2026–July 2026

Intern, Surface Mount Technology (SMT) Department

Location

- Gained hands-on exposure to end-to-end SMT PCB assembly, including stencil alignment, solder paste printing, SPI, Pick & Place, reflow soldering, AOI, and ICT.
- Performed setup and calibration of assembly equipment, in-line SPI/AOI defect monitoring, and supervised rework, and assisted in root-cause analysis of paste and component-placement defects.

PROJECTS

FPGA-Based Project Series | Vivado, Verilog |

Feb 2026–March2026

Designed and implemented 15+ digital circuits on Xilinx FPGA.

- Designed and implemented 15+ digital circuits on Xilinx FPGA including Counters, ILA.
- Focused on RTL design, testbench development, timing analysis, and resource optimization.

KEY COURSES TAKEN

Digital Circuits and Systems, Data Structures Algorithms, Network Analysis, Signal and Systems, Engineering Graphics, Analog circuits and Systems, Control System, Solid State Electronics device, Material Engineering and Device Fabrication Practice, Communication Engineering , DSP, VLSI Design , EMFT, Embedded System, Instrumentation and Measurements

TECHNICAL SKILLS

Programming: List programming languages here (e.g., C, Verilog/VHDL, MATLAB, etc.)

Tools & OS: List tools, platforms, and operating systems (e.g., Xilinx Vivado, LTspice, Ubuntu(Linux),etc.)

ACHIEVEMENTS

- **Xilinx FPGA Design Challengee-** Completed 15-project series on FPGA development 2026
- **VLSI Design Flow Certification** NIELIT RTL to GDS-II flow with RISC-V implementations 2025

POSITIONS OF RESPONSIBILITY

- **Headof Logistics**– IEEE RGIPT Hackathon: KodeKurrent , Nov 2024– Present
- **Gyanarpan Volunteer**,– Teaching Volunteering Program Nov 2024– Apr 2025
